

CA750

Finally!

A powerful,
versatile, yet
approachable
telemedicine
device.

The Telemedicine Cart Built for Telemedicine

Introducing the CA750, the latest from Avizia's line of revolutionary telemedicine devices. Designed with clinicians and patients in mind, the CA750 is a versatile telehealth system that is easy-to-use, fully integrated, and offers various customization options to support your use cases and workflow. Gone are the days of over-engineered, complicated, heavy workstations on wheels. The CA750 is here to provide an intuitive, powerful and approachable telehealth solution that supports a variety of clinical use cases.

Improve Clinical Performance & Patient Care

- Intuitive controls simplify use and allow providers to focus on patient care
- Dual screens are available for simultaneous consultation and data entry
- Seamlessly integrates with countless telemedicine peripherals
- Battery options allow untethered use for nearly an entire shift
- FDA registered class I device

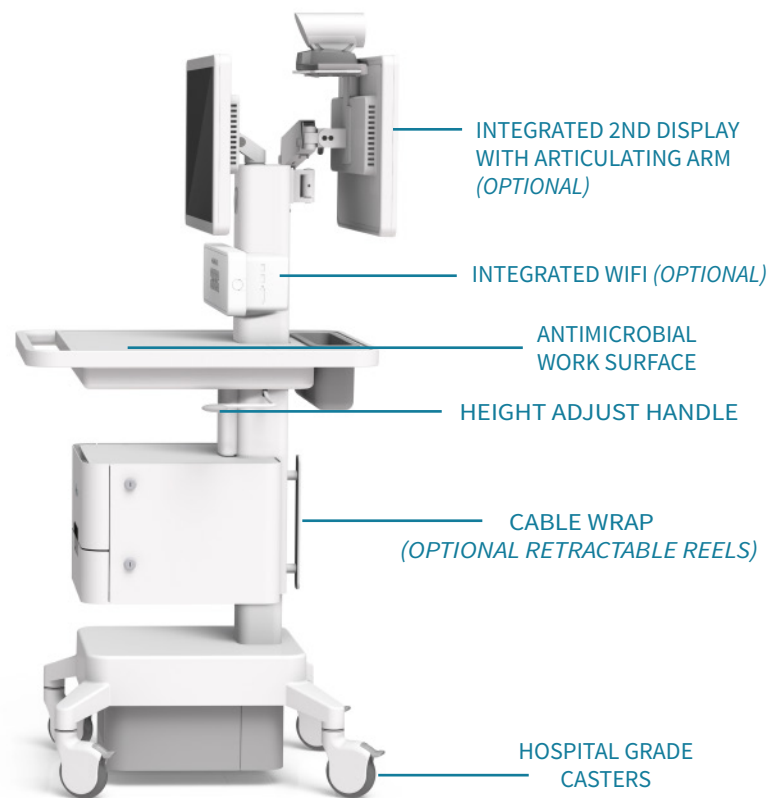

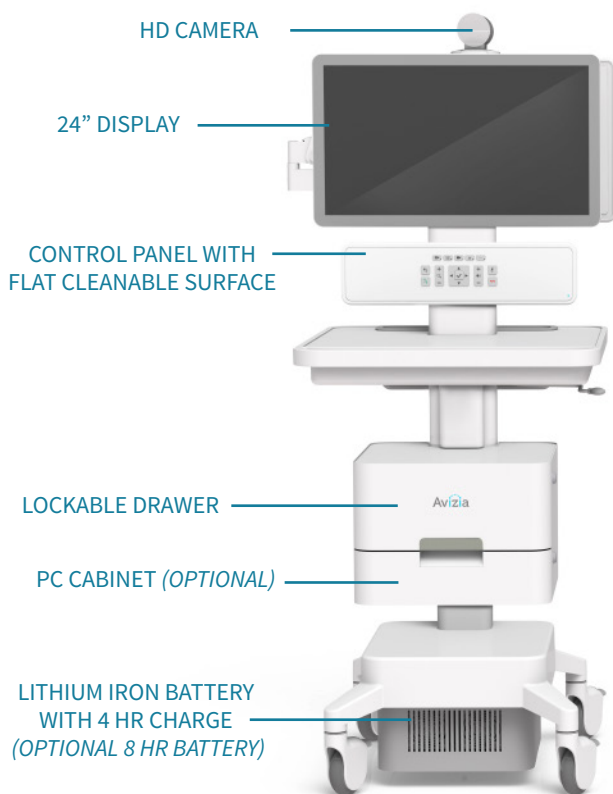

CA750 Key Features

Easy to Use: A clinically focused control panel provides intuitive and simple system control with minimal to no training.

Customizable: Not all use cases are alike. Numerous options and accessories include an integrated second display, a larger battery, a PC cabinet, a keyboard tray, and more.

Mobile: A long-lasting battery built into a lightweight, yet durable, design maximizes functionality across medical use cases and ensures that this system is easy to move from place to place.

Integrated: Dedicated ports in a built-in, lockable drawer for digital scopes and exam cameras allow peripherals to connect directly to the cart and remain connected and secure between use.

Avizia is revolutionizing the Telemedicine industry by delivering the first fully integrated solution combining video devices with clinical workflow management and HIPAA compliant communication software. Avizia offers flexible solutions that address the most common modalities that healthcare providers are striving to address today – including telestroke, behavioral health, general medicine, and emergency care.
